PROMOTION ANNOUNCED FOR FOREMAN M'DERMOTT

Special to The Tribune.

CALIENTE, Nev., June 12.-William McDermott, for several months past general foreman of the San Pedro, Los Angeles & Sait Lake Railroad company west of Callente, with headquarters at this point, has accepted an appointment as manager of the United Verdi Wining company at Jerome Verdi Mining company at Jerome, Ariz. John Conway, formerly track engineer at Moapa, has been appointed general foreman to succeed Mr. Mc-

Work on the Fetterman tunnel is progressing rapidly, and it is now in a distance of 170 feet, and still drifting in the ledge cut about a week ago.

Fred Foster, Frank Palmer and Alexander have located a group of claims adjoining the right of way of the San Pedro rallway, three miles tion work on all the claims. They are taking out rich ore at grass roots, and are very much encouraged with the outlook for pay ore in quantity.

There is considerable sickness in the camp at present, owing it is claimed by the physicians, to the presence of a pond of stagmant slime-covered water rack of the railroad yards, and but 100 feet distant, which is a constant menace to the health of the camp, and is α real breeding place for malarial disonses.

spent two days in camp and looked over a number of promising claims close to Callente, with the purpose of investment. payment.

Word has been received from Tom Word has been received from form Mariellas, formerly of this camp, that he is prospering steadily in his new home at Cherry Creek, Nev., where he bought out a business firm two months ago. This is satisfactory news to his friends and acquaintances here.

Charles B. Mooney of Ishpeming, Mich., who is largely interested in the copper properties of that section, is tooking over properties near here with a view to investment. He states that he has found within half a mile of camp a good showing of black oxide of any that Calinate will be seen to the camp as the opper, and that Caliente will be surprised ere long with a mountain of this e which has been lying within its gates for years unknown.

Triumphs of Modern Surgery. Wonderful things are done for the

human body by surgery. Organs are taken out and scraped and polished and put back, or they may be removed entirely; bones are spliced; pipes take the place of diseased sections of veins; antiseptic dressings are applied to wounds, bruises, burns and like insuries before inflammation sets in, which causes them to heel without maturation and is one-third the time required by the old treatment. Chamberlain's Pain Balm acts on this principle. It is an antiseptic and when applied to such injuries, causes them to heal very quickly. It also allays the pain and soreness. Keep a bottle of Pain Baim in your home and it will save you time and money, not to moretion the inconvenience and suffering which such injuries entail. For sale
